Corrections to stage 2

1. Changed "private keys" to primary keys
2. Eliminated "video_id" foreign key from Channel and replaced with "channelId" foreign key in Video
3. Eliminated "video_id" foreign key from User and replaced with "channelName" foreign key in Video
4. Fixed the relation of channel to video from zero or one to many to one to many.
5. Also changed the relation from user to videos to one to many.
6. Made changes to the relational schema accordingly.
7. Also added a week entity hasTag which has 2 foreign keys from Video entity and tag entity as discussed in office hours.
